RapidAuthor for Teamcenter
Simplify Product Lifecycle Support

| Market planning	Conceptual design	Detailed design	Production testing		Maintenance and services	Retirement and disposal

RapidAuthor for Teamcenter simplifies product lifecycle support by creating and updating parts catalogs, maintenance manuals, work instructions, and e-learning training courses with ease. This solution provides highly interactive and light-weight documentation that can be accessed by manufacturing and service employees on-site or in the field, enhancing customer satisfaction.

Benefits for Authors

- *Automated generation and updates*
- *Direct use of product engineering data*
- *Compliance with industry standards*
- *Multi-format publishing PDF, HTML5*
- *Multi-language authoring*
- *Teamcenter Content Management*
- *Manufacturing Process Planner*
- *Service Planner*
- *Active Workspace*

Benefits for Users

- *Richer end-user experience*
- *Easy-to-use and intuitive*
- *Lightweight data format*
- *Multi-platform support*

Achieve Efficient Product Communication
with RapidAuthor for Teamcenter

Cortona3D has partnered with Siemens DISW since 2008, offering RapidAuthor for Teamcenter. With this integration, engineering data changes are immediately reflected in manufacturing and after-sales support materials. Our solution streamlines communication, improving productivity and customer satisfaction.

Multi-platform support

With RapidAuthor for Teamcenter, you can streamline the process of generating technical documentation, saving time and reducing the risk of errors. So why not start today and experience the power of our integrated solution for yourself?
Visit our website to schedule a demo and see how RapidAuthor can benefit your organization.

RapidAuthor Components

RapidManual

- Language-based 3D animation library
- Synchronise animations with text
- Built-in XML editor
- Reuse created 3D animations in augmented reality applications

RapidCatalog

- Automatically generate parts list and match it with 3D parts
- Generate hotspotted 2D from 3D graphics with a mouse click
- Easy-to-use explosion wizard

RapidLearning

- Reuse existing procedures
- Training scenario wizard
- Multiple choice questions
- Demo, study and exam modes
- SCORM compliance

Cortona2D Editor

- Native CGM support
- Advanced hotspot editing
- Pre-define and share object styles
- Reuse existing raster graphics
